

FINCA WHITE

ECOLOGICAL LIME PAINT

NATURAL DESIGN & ARCHITECTURE

Inspired by the unique Spirit of Ibiza, IBIZΔLIVING is an architects studio based in Santa Eulalia.

We at IBIZΔLIVING are known for innovation and pushing boundaries in building and design, and more recently for our developing philosophy of sustainable builds that incorporate the axioms of sacred geometry while remaining true to the timeless Ibizan spirit.

In our desire to share our vision, and within that same framework and philosophy, we are proud to present an IBIZΔLIVINGline of home decoration and building materials. Star of which is our recent relaunching of centuries old lime paint for your home: We give you IBIZΔLIVING FINCA WHITE

01. **ECOLOGICAL PAINTING**
Based on natural elements.
02. **BREATHABLE**
Avoids humidity.
03. **FUNGICIDE AND BIOCIDES**
Prevents germs from being spread.
04. **ANTI-ALLERGIC**
Mites and moulds are avoided.
05. **WATERPROOFING**
Breathes without allowing water to seep in.
06. **GOOD THERMAL CONDUCTIVITY**
It avoids contrasts of cold and hot zones in walls and ceilings so that fungus does not proliferate.
07. **UV REFRACTION AND ENERGY SAVING**
Cooler homes in summer.
08. **RESISTANT**
It is resistant to friction and does not stain.
09. **EASY APPLICATION**
With brush, roller and spray gun.
10. **FOR ALL SURFACES**
On plaster, cement, lime mortar, plasterboard and plastic paint.
11. **NO SMELL**
No volatile toxic elements.
12. **HEALTHY**
Creates clean, breathable spaces.

FINCA WHITE

HEALTHY AND SUSTAINABLE

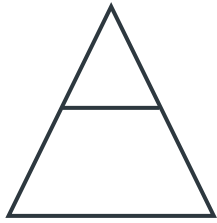

Over thousands of years, lime paint has been employed for its magnificent results and its utility in both construction and painting, especially in **the Mediterranean area**.

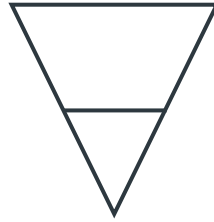

People, according to popular culture, prepared the paint by baking limestone rocks for hours in wood-fired ovens, then they extracted the lime and **milled and mixed it with water**.

Our **ecological lime paint** is the result of a desire to reclaim this natural method, deeply rooted in the **history of Ibiza**, where limestone abounds. Painting with it keeps the interior and exterior walls of houses in perfect condition, creating an effective, sustainable and healthy result.

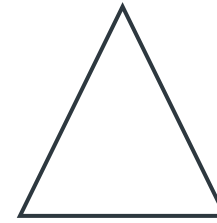

We have collected and updated this legacy, formulating a traditional paint but with modern technology to provide the best possible performance, while retaining its own luminous and mineral appearance, absence of harmful volatile organic compounds (VOC), with excellent coverage and easy application.

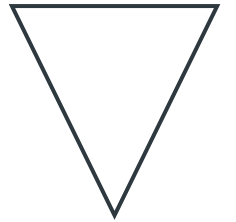

AIR

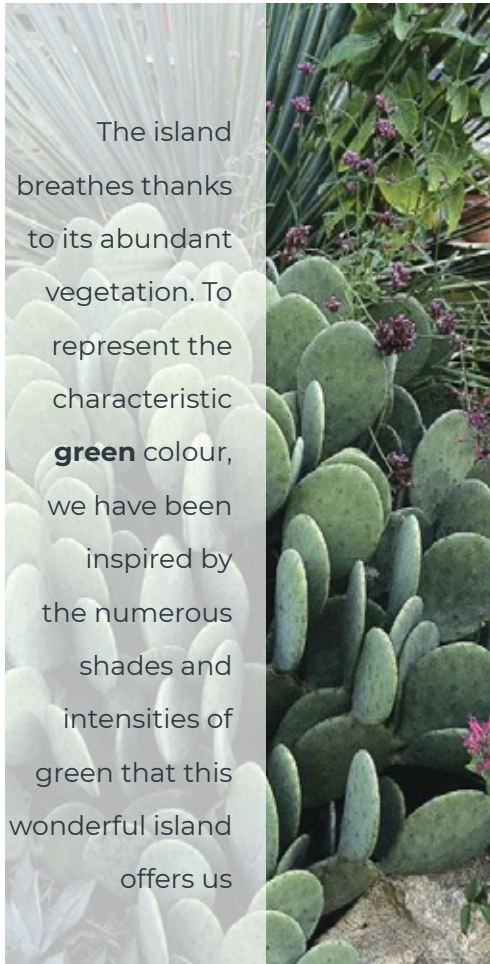

EARTH

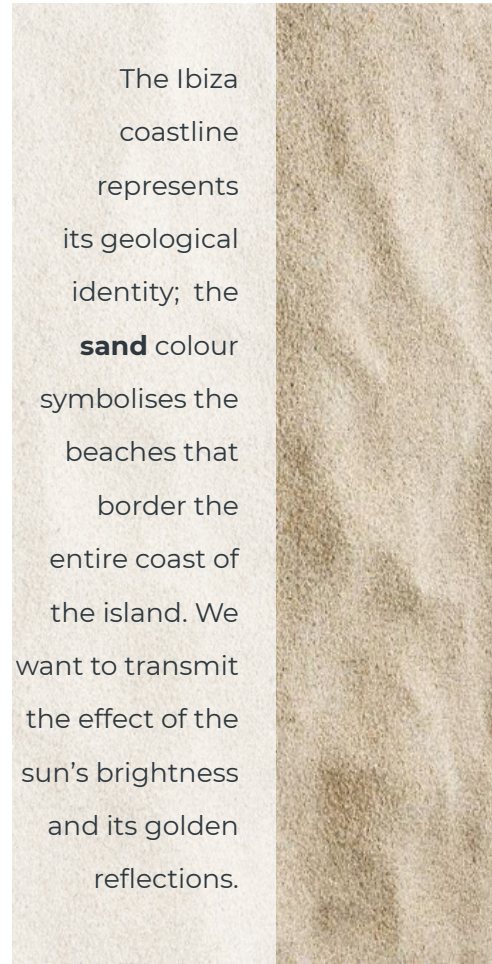

FIRE

WATER

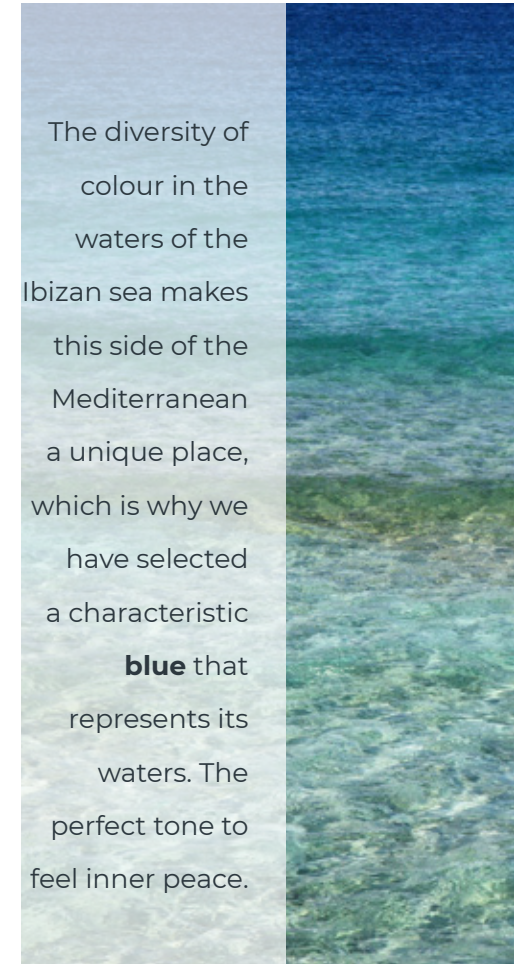

The island breathes thanks to its abundant vegetation. To represent the characteristic **green** colour, we have been inspired by the numerous shades and intensities of green that this wonderful island offers us

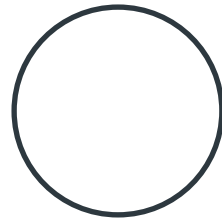

The Ibiza coastline represents its geological identity; the **sand** colour symbolises the beaches that border the entire coast of the island. We want to transmit the effect of the sun's brightness and its golden reflections.

The **red** colour comes from the inspiration of the cultivated fields, exposing the reddish colour so characteristic of the island, which contrasts with the vegetation and transmits the wild force of the most primary nature.

The diversity of colour in the waters of the Ibizan sea makes this side of the Mediterranean a unique place, which is why we have selected a characteristic **blue** that represents its waters. The perfect tone to feel inner peace.

SPIRIT

We took inspiration from the nuances of Ibiza to create our range of colours. Each colour represents one of the five elements.

The essence of everything, the identity of the island, the colour white characteristic of Ibizan houses, the reason for which Ibiza is known as the White Island.

IBIZA LIVING has created ecological lime paint; FINCA WHITE with historical identity and adapted to our modern demands, offering a healthy paint for our houses that is respectful with the environment.

Finca white lime paint is **ecological** because it is composed of aerial lime and selected minerals, it does not contain solvents or toxic products.

It is also **permeable** to water vapor, and since it does not accumulate humidity, it enables the walls to breathe, avoiding serious diseases and generating healthy spaces.

At the same time it is **waterproof**, as the paint deeply penetrates into the porousness of the surfaces and prevents water seeping through the walls, avoiding humidity entering the interior of the house.

These types of paints are very **healthy** and **anti-allergenic** as, due to their alkalinity, they prevent bacteria or micro-organisms from adhering to the surface, thus considerably reducing allergy problems in the home caused by mites and mold. This same quality makes it **anti-fungal**, by not allowing mold spores, algae, lichens and bacteria to establish themselves.

In addition, the FINCA WHITE lime paint is resistant to rubbing, and has very good behaviour in exposures or adverse environments such as rain or hail, is resistant to UV rays and is also flame-retardant. It is dirt-free and odourless as it does not contain volatile substances.

TECHNICAL INFORMATION

COMPOSITION

Air lime CL90 (UNE EN 459-1 :2001), lime water, water as solvent, micronized marble, resin and other additives.

Extract Dry 42,5%

TECHNICAL INFORMATION

PH: $13 \pm 0,05$

DENSITY: approx. 1,35 kg/l $\pm 0,05$ g/cm³

PERMEABILITY TO WATER VAPOUR: factor $\mu=15$ (UNE-EN ISO 7783)

VISCOSITY: 6000 \pm 1000 cP (UNE-EN ISO 2555)

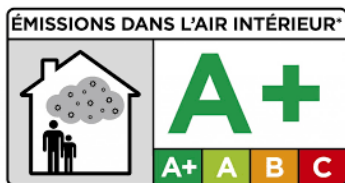

FREE FORMALDEHY CONTENT: <0,01 mg/kg (VdL-RL 03)

VOC CONTENT: <1 g/L (ISO 11890-2)

DRYING: 24h (+23°C, 80% RH)

CERTIFICATION

ISO 16000 with best result A+.

01. **PERFORMANCE**

For good coverage it is recommended to apply two or three coats. The performance of lime paint depends on the application tool and the support on which it is applied. With 1 litre it is possible to paint about 4 square meters, two coats.

02. **SURFACE TYPE**

On any porous surface (plaster, stone, mortars, etc.). It can also be applied on plasterboard walls and / or painted with synthetic paint, although breathability is compromised.

It is not recommended to apply it on waterproofed or low porosity surfaces (varnish, plastic, metal, etc.).

03. **APPLICATION**

The paints are suitable for painting all types of exterior and interior walls where a quality finish is desired. You can apply with roller, brush or gun.

04. **SAFETY**

Lime paint is alkaline. In case of contact with the eyes, wash them immediately with abundant water. Keep out of the reach of children.

FINCA WHITE ecological lime paints for indoor and outdoor use are presented in containers of 15, 10 and 5 liters.

Immediate delivery of white paint and colors from the chart.
